

Expand Your Network Horizons with Switch Licenses

**Switch License
Solution Brief**

Expand your network horizons with switch licenses

The Ethernet switch plays an essential role in the network, serving as either a core or an access switch. As the demand for bandwidth continues to rise with the proliferation of modern applications, the Ethernet switch must expand its capacity while maintaining flexibility to

keep pace with technology and speed advancements. Zyxel Switch Licenses bring the flexibility for customers to invest in network upgrades for advanced features based on their network and business requirements.

Protect Your Investment

Customers can start with a new network setup by purchasing Ethernet switches that run with standard firmware. Premium Licenses with advanced features can be purchased as the business grows. This works well to protect network assets with the purchase of additional licenses instead of buying new Switch hardware, making it the most cost-effective solution to consider when meeting the demands of a scalable network.

Expand Capabilities As Needed

Our Switching licenses resolve network bottlenecks with options for greater scalability, allowing you to easily expand your Layer 2 and Layer 3 system capacity to cover the growing demand for traffic in the network infrastructure.

Access Advanced Features

Some of the advanced licenses enable advanced security and premium features of Ethernet switches, such as RIP, OSPF, and even the dedicated Networked AV mode, enabling more sophisticated network management. It offers organizations stronger network protection to construct a robust enterprise network.

Lifetime Licenses

With the purchase of the Switch license, it is a perpetual license that can be locked to the device for an indefinite period of time. The ease of license installation saves time from annual renewal and license management.

Easy to Activate

We simplify the process to only four straightforward steps to activate Zyxel Switch License. It costs you less than a cup of coffee to finish the activation.
