

## R a n S o m W a r e

Don't Let Your Device Become a Hostage

With the advancements of internet and technology, it is now a digital world. Our most vital and confidential information is aggregated to our computers and devices. This has become an extremely lucrative resource for hackers by employing ransomware, targeting end users and companies.

### Ransomware Attacks Daily

**\$209 Million**

paid in ransom by companies in Q1

**62**

NEW families of ransomware

**54,000**

ransomware modifications by end of Q3
