Astra Cloud-based Engineless Endpoint
Preview Edition User Guide

Table of Contents

v1.0   09/2021

Introduction

Hey there reviewer,

In this review guide, we'll get

you quickly up and going with

our new Zyxel Astra service. The Zyxel Astra is to secure your remote

users, roaming everywhere outside existing perimeter. It puts all

aspects of security protection back into the hands of the network

administrator and allows them to monitor and secure users

regardless locations.

|	
	Predict Build ability to identify people, device, and applications
	Prevent Anyone attempting to access a resource must authenticate first with strong authentication method through monitor websites/IPs
	Detect Real-time web-browsing detection for what is being identified as malicious
	Response Timely traffic monitoring and 7-day historical data store for admin

Limitations of Astra Service Preview Edition

- Single VPN connection at the same time
- Hotspot service can't share when Astra on. But if user turn off Astra service, then user can share hotspot.
- Google Photos backup is not supported while any VPN service is on.
- Xiaomi and OPPO R11 mobiles are not supported. Because Chinese phone is not allowed run any app in background system, even after user change the setting.
