Do you find it hard to fix these network problems?

- ✓ Insufficient capacity to support the increasing number of wireless clients
- ✓ Unsatisfactory wireless security with complex management and little analysis
- ✓ Resolving coverage problems without requiring structural changes to the buildings
- ✓ Replacing obsolete equipment from different brands making the network difficult to manage

Customer Pain Points

Zyxel Solutions

Benefits

Security

Increase online safety and privacy from anywhere

Connectivity

Say goodbye to WiFi dropouts and slow connections

Management

Launch a network in minutes with easy deployment

HOSPITALITY

ACHIEVABLE PERFECT STAY
WITH WIRELESS ACCESS
AVAILABLE EVERYWHERE

Whether for a tourist planning an itinerary or a businessperson organizing a meeting, internet access is a top priority for travelers. Discover how we help hotels offer reliable network connections and enhance guest satisfaction.

Fortune Inn Riviera

Industry

Hospitality

Location

Jammu, India

"The ease of management and the deployment of equipment has made it easy for us to provide quality WiFi for every visitor, wherever they are."

Mr. Giriraj, IT Manager
Fortune Inn Riviera

Zyxel's Wireless Solutions Wow India's Leading Hotel Clients

Challenges

Fortune Inn Riviera aimed to provide the best customer experiences to visitors with top-notch hotel amenities, including lightning-fast WiFi to every guest. To achieve the goal, it was necessary to build a new wireless network which could support a high number of clients, and enable easy, and centralized network management of all network devices.

Results

- ✓ Smooth and stable WiFi creates great guest experiences
- ✓ IT administrators can rapidly plan, deploy, and monitor networks
- ✓ Remote visibility and monitoring allows for real-time intervention

“We wanted to build our network infrastructure by incorporating the latest technology. The new network is fast, reliable, and easy to manage – and we’re very grateful to Radonik, VIP Telecom and Zyxel for their great support and solutions.”

Vladimir Karafizov IT Manager
Kings' Valley Medical & Spa Hotel

Delivering Top-notch Wireless and Customer Services

Challenges

Kings' Valley Medical & Spa Hotel wanted to ensure fast WiFi and full coverage in all indoor and outdoor areas. Firstly, they had to overcome WiFi interference due to the building structure, and deliver excellent connectivity for a true triple-play experience. Secondly, the hotel needed a solution to manage the large number of devices with a complete overview of the network status from a single point to make sure network performance.

Results

- ✓ Great guest experience through excellent WiFi service and seamless connectivity
- ✓ Nebula cloud-based network management enables the entire network to be managed from a single interface anytime, anywhere

“With this smart, advanced technology, we have brought a touch of modernity to this historic, refined place. It has been an exciting step forward.”

Stefano Toffano, Technical Manager
ETA srl

Historic Italian Hotel's Network Gets a Much-needed Facelift

Challenges

Marchese del Grillo wanted a new network which could bring high-speed WiFi to large indoor and outdoor areas, and allow for easy changes and expansion in the future. Several hurdles stood in the way of this, such as interference from the building's 1.5-meters-thick walls and the existing network's obsolete equipment and non-centralized nature. Besides, the obsolete equipment from different brands was hard to be managed.

Results

- ✓ Secure network for staff and guests via VLAN and data protected
- ✓ Stable, high-performance WiFi in all indoor and outdoor areas
- ✓ Centralized, futureproof network with failover for data backup and VoIP services
- ✓ Easy-to-manage, centralized cloud networking management

Soaring to New Heights with Better WiFi and Management Efficiency

Challenges

Monarch Skyline Hotel approached the Zyxel team with two goals: increase wireless speeds and coverage, and enable staff to fix network problems quickly and easily. The hotel had to ensure stable, high-speed wireless in guest rooms and high-quality wireless throughout the hotel, and replace inefficient network management, allowing network problems to be identified immediately.

Results

- ✓ Secure, high-speed wireless throughout the hotel delivers optimal guest experience
- ✓ Nebula enables easy, efficient network management via smartphone – anywhere, anytime
- ✓ Significantly reduced maintenance thanks to stable infrastructure

"We would like to thank Atasayar Teknoloji and Zyxel for their support, from nailing down the project scope, to project management, to selecting products and services, to where to install the equipment."

Serdar Yildiz, General Manager
Narven Thermal Town

Rebuilding a Network from the Ground Up for Sprawling Turkish Resort

Challenges

Narven Thermal Town knew that the perfect stay isn't possible without perfect wireless accessible from everywhere. However, its network capacity was insufficient for all indoor and outdoor areas, and network devices was unable to be managed from a single point. Moreover, large footprint of the 450,000-square-meter site and its large number of rooms complicate network installation.

Results

- ✓ Reliable connectivity supports up to 7,000 active devices
- ✓ Secure network without sacrificing speed or performance
- ✓ Smooth, high-speed WiFi access across entire facility
- ✓ Simplified networking management via the cloud

Impeccable Hotel WiFi: The Key to Better Guest Satisfaction

Challenges

For Xinshe Hotel, reworking its network atop its to-do list to meet the intense internet needs of modern travelers. They had to renew the existing infrastructure because it was a hodgepodge from various brands, making centralized management impossible and causing weak, unstable connectivity.

Results

- ✓ High-quality WiFi throughout the hotel, delivering higher customer satisfaction
- ✓ Secure and safe connections safeguarded by top-notch firewalls
- ✓ Easier and more efficient network management enables IT staff to monitor connections and troubleshoot issues in real time

“Strong communication infrastructure and uninterrupted internet access are among the main needs of the modern education system. We thank Zyxel and business partner Atasayar Teknoloji for their support.”

Faruk Tatar, CEO
Balıkesir Bilnet College

Expanding Students' Global Outlook with Strong Network Infrastructure

Challenges

Balıkesir Bilnet College needed reliable network connectivity across the campus for providing high-quality education. Since the school had a large campus with several buildings serving different purposes, ensuring consistent coverage was perceived as a challenge. Speed was not the only issue, because to support educational solutions, the network had to have high capacity too.

Results

- ✓ Continuous 24/7 connectivity and backup with separate networks for staff and visitors
- ✓ High-speed, high-capacity system for fast internet access of multiple users
- ✓ Active network devices that are easy to install and manage, controlled by the cloud platform

“Our students are getting a better digital learning experience, and managing the wireless infrastructure saves a lot of time and hassle for our IT people.”

Niharika D'Silva, Chief Operating Officer
Gopal Sharma Group of Schools

Helping Indian School Enhance Student Learning Experiences

Challenges

The school management wanted to build a new network because there were issues like network disruption, latency, and frequent wireless disconnection. Besides handling those issues and providing a better learning experience to their students, the investment should be able to provide longevity and scalability while not exceeding the budget limitations.

Results

- ✓ Easy, reliable, and centralized managed wireless network
- ✓ Optimized WiFi gives students a better digital learning experience
- ✓ Protection from a variety of network attacks and unauthorized applications

Make Tech-enriched Education Possible at Indian University

Challenges

To support over 200 students in the university's new building for its Agricultural Science and Tech Department, Integral University required to renew its network that could offer high bandwidth to meet the demands of the densely populated student body, particularly with large numbers of them accessing media-rich learning materials at the same time.

Results

- ✓ Hassle-free WiFi network access for students and teachers
- ✓ Enriched, higher-quality education possible through Zyxel's latest network technology

“Thanks to Zyxel’s and Arma Bilişim A.Ş for their deployment of a top-class wireless and wired network, so that we can implement the most advanced educational technologies.”

Halil Topuzöz, IT Manager
MEV College Private Schools Bornova Campus

Providing Technology-Enabled Holistic Learning to Students

Challenges

Turkey's MEV College has a Bornova campus that required to provide network access to each part of the large campus with thousands of connected devices and IP surveillance cameras. Also, video-based solutions transmitting over the wireless network were essential, but this was a challenge as it significantly increases bandwidth use, potentially clogging up the system.

Results

- ✓ Reliable and robust network infrastructure throughout the campus
- ✓ Easier and more flexible network management via the cloud
- ✓ Pleasant online learning experiences

“With Zyxel's high-performance switches, our network operation is totally smooth, and this is making for better learning quality. Our new system is extremely easy for our staff to manage, even those with little IT expertise.”

Chris Kao
Assistant Manager of Management Department
Shane International Preschool

Improving Teaching Quality and Competitive Edge with Zyxel's Switches

Challenges

Shane International Preschool covers over 1,000 square meters, making it a challenge for them to ensure a smooth network with high data rates and stability. Besides, its infrastructure was not easy to install, manage and use. It had to build a new network to support a 24-hour video surveillance system to create a safe campus environment.

Results

- ✓ Smooth and fast installation – invaluable amid COVID-19 restrictions
- ✓ High-performance network service delivers stable operation of computers, IP phones, and CCTV system
- ✓ Simple, efficient and convenient network management

Powerful New Networks Fulfill the Potential of Turkish Tech Education Centers

Challenges

With the existing networks unable to deliver the high speeds and security needed, Ankara Metropolitan Municipality wanted to overhaul the infrastructure at each of the three TechBridge Academy centers. The project came with a few requirements: being completed within a tight schedule and without interrupting daily operations. Besides, the IT admin had to be able to manage the new networks remotely and easily, and ensure network security.

Results

- ✓ New infrastructure offers high-level security, performance and speed
- ✓ Nebula enables the networks to be managed completely via the cloud

"The easy device deployment and network management has made it easy for us to provide quality WiFi for every visitor, wherever they are."

Juan Bautista García de la Calle
Head of Internet & Communications Section
Ciudad Real Provincial Council

Ensuring Great Event Experience with Speedy and Secure Connectivity

Challenges

Regularly holding events attracting thousands of people a day, Fair Pavilion of Ciudad Real had its sights set on a network overhaul that could ensure secure, lightning-fast wireless for visitor and admin use across its 12,000 square meters. Besides handling large visitor numbers, the new network should simplify complicated network management, and improve poor analysis and reporting capabilities.

Results

- ✓ Up to 10 times higher browsing speeds eliminate video and audio dropouts
- ✓ Whole network can be monitored and controlled easily via intuitive interface
- ✓ Beefed-up security with password encryption and easy-to-configure alerts for potential intrusions

Optimizing Work Environment with Higher Network Capacity and Security

Challenges

Directorate of Geology & Mining officials were using wired connectivity that was limiting the end users count due to port shortage on the switches. With the rise in the number of end users roaming within the office premises, the management was looking for a new wireless infrastructure for a better work environment. They also required a security firewall to protect their internal resources from cyberthreats.

Results

- ✓ Fast and smooth wireless experience
- ✓ Network protection from a wide range of cyberthreats
- ✓ Scalability over the existing network infrastructure

“Zyxel’s solutions deliver high network performance and internet access speeds. In this case, we’ve helped the hospital increase its work efficiency and provide uninterrupted healthcare services.”

Yalcin Perktas,
Dugan Computer

Standing Ready for Today and Tomorrow with Futureproof Network

Challenges

Ankara Kecioren Education and Research Hospital was planning to upgrade its network to address the increasing number of visitors and connected devices, which were exacerbating existing capacity and data-processing problems. The upgrade would prepare the hospital for the health sector’s digital transformation. Besides, the hospital needed to ensure the network is secure enough to protect patients’ data and is easily controllable.

Results

- ✓ Site-wide WiFi allows smooth network access and data process
- ✓ Efficient medical and corporate workflows thanks to network prioritization, simplified management, and flexible network infrastructure
- ✓ Greater security via separate internet services for hospital staff and patients

“Medical facilities manage a large amount of personal and medical data, so the priority is to provide them with an appropriate level of security. When designing the IT infrastructure for the center, we knew using Zyxel's solution would provide the highest level of protection.”

Grzegorz Olejczny, CEO
System-3 Sp. z o. o

Securing Sensitive Data in Polish Medical Facility

Challenges

Like many healthcare facilities, Dementia Center in Ścinawa require comprehensive network infrastructure to provide patients with high-quality services while protecting their sensitive data. The new network should be able to deliver on these demands with fast, secure and trouble-free internet as well as an easy-to-manage interface that could coordinate the operations of its various departments and offices.

Results

- ✓ Fast and trouble-free wireless throughout the facility
- ✓ Network's reliability optimizes the treatment processes
- ✓ New infrastructure delivers high scalability, business continuity, and data security

"Zyxel is exactly the kind of manufacturer you want to see, as it thinks along with the end customer – it's not just concerned with selling products and moving on."

Mark Steenman, Founder
Stemere ICT

Allowing New Independence for Dutch Care Center Residents

Challenges

With the growing numbers of residents at its centers and with new centers in the works, Martha Flora's existing network was buckling under the pressure. For instance, the network could not handle speeds of 500 Mbps or more, which are now necessary for streaming and video calls. Furthermore, some care centers had a guest network while others did not. Also, they are vulnerable to cyberattacks due to lack of security measures.

Results

- ✓ Seamless high-speed network services support continuous connectivity for large numbers of connected devices and allow for future expansion
- ✓ Robust cybersecurity protection for all connected devices as well as guest and office networks
- ✓ Easier, centralized network management saves time and costs for IT staff

"Zyxel's Nebula has a very user-friendly interface. It really helps me as an IT admin to be able to manage a complicated network system easily and remotely."

Trần Lộc Xuân, IT Manager
Airports Corporation of Vietnam JSC

Brining Sky-high Speeds and Security to Under-construction Airport

Challenges

Airports Corporation of Vietnam knew its previous approach of mixing devices from various manufacturers wouldn't deliver the necessary management efficiency to the Long Thanh International Airport. It needed an all-in-one solution which could provide reliable wireless connectivity for hundreds of simultaneous connections, robust cyber security protection for the critical infrastructure, and flexible management with an extensive log for easy transfer to another IT department.

Results

- ✓ Stable and high-speed connectivity 24/7 via WiFi 6 APs and switches
- ✓ Site-wide topology with a 365-day log for remote troubleshooting and monitoring anytime, anywhere
- ✓ High-level security powered by cloud intelligence effectively tackles unknown threats

- MagicOffice Repeater

"It's changed everything. There are now no more customers or employees dissatisfied with the mobile coverage."

Davide Olivieri, Sales Manager
Teleimpianti S.p.A.

Transforming Italian Stores' Mobile Signals from Zero to Hero

Challenges

Facile.it's stores are located on the ground floors of historic buildings, the thick walls of which were causing severe interference and poor cell signal coverage. Making matters worse at some stores was the presence of underground rooms. With employees and customers struggling to get a signal, productivity was low. The major challenge was that resolving coverage problems without any structural changes to the buildings.

Results

- ✓ Stable, high-quality mobile signals available throughout the stores
- ✓ Smooth communication for employees and customers thanks to exceptional voice and data quality
- ✓ Repeater's simple installation requires minimal planning and work

High-performance Network Keeps Kyrgyzstan Gas Stations Going Strong

Challenges

With gas stations nationwide, Kyrgyzstan Gas Station was facing network reliability issues. The long distances between stations and their outdated network infrastructure meant critical information, like for sales and remaining stock, was getting to headquarters late and sometimes with distorted data. It needed to connect all stations with the headquarter 24/7 via high-speed channels using affordable equipment with long-term durability.

Results

- ✓ Reliable infrastructure ensures smooth business operations for branches and secure, high-speed data transfer with HQ
- ✓ Affordable, long-lasting solution delivers competitive cost of ownership

“Zyxel’s equipment has delivered seamless WiFi coverage across 40,000 square meters of shelves and 10,000 square meters of open warehouse. It also ensures comprehensive network management via the cloud for the customer’s IT team, wherever they are.”

Roberto Asinelli, Representative
So.Roasi

Making Complex Deployments in 50,000m² Italian Warehouse a Breeze

Challenges

The leading transport company Sogedim had a disjointed network offering wireless coverage to only limited parts of its new logistics center. To ensure better work efficiency, it had to consolidate and expand its network for providing high-performance, reliable WiFi across 10,000 square meters of open warehouse and 40,000 square meters of warehouse shelving as well as creating secure internet connections among offices.

Results

- ✓ Seamless wireless network across all office and warehouse areas
- ✓ Comprehensive UTM firewall ensures secure internet connections
- ✓ Unify complex network infrastructure with easy-to-use cloud network management

Evgeny Yevtushenko
Head of Maintenance Department, UMAI Group

Kyrgyz Retailer’s Network Equipment Yet to Fail Once for 8 Years

Challenges

Nearly a decade ago, the fast-growing retail chain UMAI Group unified its branches under a single network. At the time, each store maintained its own network, all using different equipment, often designed for home use. To improve network quality, it had to build a fault-tolerant infrastructure capable of operating 24/7, and connecting branches to the internet via different ISPs.

Results

- ✓ Fault-tolerant infrastructure capable of operating 24/7
- ✓ Multi-site branches can be managed easily and effectively
- ✓ Improved customer service supported by trustworthy networks
