

Hotel Seeklause

Hotel Seeklause

Hotel Seeklause in the seaside resort of Seebad Trassenheide on the Baltic Island Usedom has a very good reputation as a family hotel and has been awarded the "Quality Seal for Family Friendly Policies" on several occasions.

The owners of the hotel, the Römer family, took over the hotel in 1993. Originally, the hotel was built in 1978 and for a long time was used as a holiday camp. Since the take-over, the Römers have invested about 10 million euros in extending and modernizing the hotel - their main goal being to attain the 3 star rating. And this was achieved this year! The transformation from a holiday camp to a modern hotel has been successfully completed. Now the hotel offers 102 beautifully furnished rooms, a new and exclusive wellness area with a swimming pool and a large outdoor area, ideal for children, with a playground and an 800 qm lake.

One of the most important criteria to attain the 3 star hotel category is the provision of an internet access to all rooms. The telecommunications system which was installed in 2002 had to be modernized and refitted. Frank Wöllner, from the company "Rügenprovider" who has been working for the hotel and taking care of the network and telecommunications structure for a number of years suggested an inexpensive WLAN installation which would enable the WLAN service not only in the lobby and in the restaurant but also could cover the large outdoor area. Wöllner's choice was ZyXEL's solution: "The ZyXEL hotspot installation with a total of 17 access points, which are connected via two ZyXEL switches, is an extremely effective and inexpensive WLAN solution."

Hotel owner, Mr. Römer, comments on the expectations of his guests: "The number of guests requesting internet access is increasing extremely rapidly. We're really glad that we can now - thanks to the ZyXEL hotspot solution - offer this service which is easily accessible and low cost too. Due to the fact that we have purchased the products we can act completely independently of a provider and offer individual rates for the access. This is a really great service. We are extremely satisfied with the solution. It runs very stably and so far we haven't experienced any problems. Also, because the system is an open structure and expandable, we're in a position to extend the service easily and can include the park area and the new sports facilities we are building with an outdoor access point."

Product Used

G-4100 v2 hotspot solution

G-3000H or NWA3100

ES-2024 PWR switches.

About ZyXEL Communications

ZyXEL Communications Corp. (TSE: 2391), headquartered in Hsinchu, Taiwan, is the world's leading residential gateway provider and was recently ranked as Taiwan's First "Green Enterprise," and the second best "Green" Company in Asia (2007 CG watch, Asian Corporate Governance Association). ZyXEL's comprehensive Internet Protocol-based (IP) networking solutions include access multiplexers, customer premise equipment, Internet security and Wireless LAN equipment, enabling high-performance network services for SOHO, small to mid-sized businesses and service providers. ZyXEL works closely with worldwide network equipment vendors, telecommunications companies, ISPs, and other major businesses.
